

## "The Secret To Getting Listed In Google In Under 48 Hours!"

You may or may not have heard people claim they can get listed in Google in only 1-2 days. It seems that nearly 100% of the **people you run across in forums act like in order to get indexed by Google within 48 hours is some miracle feat** that can only be accomplished by doing some "top secret" marketing tactic or advanced optimization strategy.

Well, the truth of the matter is...

Getting listed in Google in under 2 days is quite easy!

**First let's talk about what NOT to do.** This drives me absolutely crazy when I see people doing this, and is actually what I did at one time as well. After you read this lesson, **DO NOT** waste your time doing this. I repeat... **DO NOT** waste your time doing what I'm about to tell you.

The following URL might look familiar to you:

<http://www.google.com/addurl.html>

The image shows a screenshot of the Google 'Add your URL to Google' submission form. The form is titled 'Add your URL to Google' and is part of the Google search engine interface. It includes a search bar on the left with the text 'Find on this site:' and a 'Search' button. The main content area is titled 'Share your place on the net with us.' and contains the following text: 'We add and update new sites to our index each time we crawl the web, and we invite you to submit your URL here. We do not add all submitted URLs to our index, and we cannot make any predictions or guarantees about when or if they will appear.' Below this text is a section for entering the URL, with instructions: 'Please enter your full URL, including the http:// prefix. For example: http://www.google.com/. You may also add comments or keywords that describe the content of your page. These are used only for our information and do not affect how your page is indexed or used by Google.' There are input fields for 'URL:' and 'Comments:'. Below these is an 'Optional:' section with instructions: 'To help us distinguish between sites submitted by individuals and those automatically entered by software robots, please type the squiggly letters shown here into the box below.' The squiggly letters '3M5KNDV' are shown in a red box. To the right of the form is a sidebar with 'Other Options' including 'Instant Ads on Google', 'Google AdSense for Web Publishers', and 'Google-Quality Site Search'.

This is Google's actual website submission form. They state that you can use this form to submit your website to their index of websites and it can take up to 6 weeks for your website to be placed into their index.

I don't know about you, but 6 weeks is a heck of a long time to just wait to be placed in their index rotation, let alone get a top ranking!

### Never Use The Google Submission Form!

You should never use this form, or any other of the top search engine's submission forms. These search engines include Yahoo, MSN, Altavista, Alltheweb.

### So, how do you get your website indexed within 48 hours?

There are many methods, but for someone that has a new website and doesn't have tens of older websites already indexed by Google, there are **2 main ways** I would suggest to get indexed into Google quickly. Note, when I say "Google", I'm basically referring to Google, Yahoo, and MSN.

#### Method #1

First thing's first, before I can teach you how to get indexed quickly, you need to know how search engines find websites. It's very simple.

The way that search engines find new websites is they will visit 1 website that is already in their index, then from that site, they'll follow all of the links on that site, to visit the next site. Then they'll visit that website and

visit all of the links on that page and so on... This is called "crawling". Search engines will "Crawl" your website to find new information and place it into their index of search results.

In the example below, if Google were to visit this webpage, it would then "crawl" all links on this site, to find other websites like:

- <http://www.weightlossarticles.com>
- <http://www.dietlinks.com>
- <http://www.weight-by-date.com>

Ok, so let's think about this for a minute... Let's say that you have a new website (www.MyCoolWebsite.com) and you just created it. It's not indexed by any of the search engines. Meaning, the search engines don't know this website exists yet.

So, how would the search engines find out about this site? Easy... They need to find your site by following links on websites that are already in their index. Make sense?

Alright... now, once we know this, all we need to do is find websites that are already indexed by the search engines and get them to link to us. That's all fine and dandy, but it can be a little tricky getting others to link to your site, if they have no incentive to do so...

No problem, that's why we'll use this method I'm about to teach you, to get TONS of websites to link to your site quickly.

All you'll need to do is write 1 article based on the topic of your website. Because our website is called www.MyCoolWebsite.com, we'll write an article called, "10 steps to becoming the coolest guy on the block". At the bottom of our article, we'll include a link to our website (<http://www.MyCoolWebsite.com>)

Once we've done this, we'll visit many of the popular article directories on the web, and we'll simply submit our article to those directories. Once they've added our article AND link to their site, the search engines will visit their website, and then follow all the links on their site. 1 of those links will be a link to our site, and BAM! We're indexed by the search engines.

The more article directories that we submit to, the more links we'll get back to our website, and the more times that search engines will visit our site. The more links you get, the quicker you'll get indexed.

Sounds simple, right? Well, it is!

Here's a list of the most popular article directories you can submit your website to...

1. <http://www.goarticles.com>
2. <http://www.ezinearticles.com/>
3. <http://www.articlecity.com/>
4. <http://www.certificate.net/wwio/>
5. <http://www.amazines.com/>
6. <http://www.articledashboard.com/>
7. <http://www.article-directory.net/>
8. <http://www.submityourarticle.com/articles/>
9. <http://www.magportal.com/>
10. <http://www.isnare.com/>
11. <http://pubs.acs.org/hotartcl/>
12. <http://www.article-hangout.com/>
13. <http://www.webarticles.com/>
14. <http://www.articlecube.com/>
15. <http://articles4content.com/>
16. <http://www.article-buzz.com/>
17. <http://www.free-articles-zone.com/>
18. <http://www.newarticlesonline.com/>
19. <http://www.articletogo.com/>
20. <http://www.articleworld.net/>
21. <http://www.impactarticles.com/>
22. <http://www.articlealley.com/>
23. <http://www.directorygold.com/>
24. <http://dir.salon.com/>
25. <http://www.articlefever.com/>
26. <http://www.content-articles.com/>
27. <http://www.softwaremarketingresource.com/marketing-article-directory.html>
28. <http://www.niche-article-directory.com/>
29. <http://www.jogena.com/articles/articleform.htm>
30. <http://news.collectors.org/>
31. <http://article-niche.com/>
32. <http://blogtelecast.com>
33. <http://superpublisher.com/>
34. <http://www.articlecentral.com>
35. <http://www.article-directory.net>
36. <http://www.article-emporium.com>
37. <http://www.ebooksnbytes.com>
38. <http://www.ideamarketers.com>
39. <http://www.internethomebusinessarticles.com>
40. <http://www.site-reference.com>
41. <http://www.stickysauce.com>

That's really all there is to getting indexed by Google within 48 hours. Ok, now let's move on to another method of getting indexed by Google quickly.

## Method #2

Let's go back to our weight loss website from the previous lesson for now. First...

- Go to Google and enter the broadest keyword you can think of that's related to your website. In our example, it will be "weight loss". Once you've done this, you'll see a list of Google results.
- Browse through each website and pay particular attention to the Google Page Rank of the website.

**Note:** As I said in lesson 1, Google Page Rank is measured by the number of websites and the "importance" of those websites that link to your website. In general, the more websites that link to your website, the higher your Page Rank will be.

- So, as you're looking at these top ranked websites for the search term "weight loss", you should try to find websites with a Page Rank of 6 or higher.
- Once you've found several websites like this, you should search their website for their contact information.
- Once you find their contact information you should send them an email asking if they will link to your website in return for you linking back to their website. If you do this correctly and professionally, they will respond and will place a link on their website to yours.

**Note:** Obviously, in order to persuade someone to add your link to their website, you must give them a good reason to do this. So, always contact sites that are highly related to yours AND always think of a way that you can offer them something their visitors would benefit from if they add your link.

If you can manage to get **1 PR6 website** to link to your website, you should be indexed by Google in **under 3 days**. If you can get **1 PR7 website** to link to you, then, in most cases, you will be in Google's index **in under 24 hours!**

Sometimes persuading the higher page rank websites is pretty tough, so there's another option you can pursue and that is ...

### **Purchasing Text Links - But For Only 1 Month**

Purchasing links from high Page Rank websites. The easiest and fastest way to do this is to visit 1 of the many link purchasing websites. Here are a few of the better ones:

1. <http://www.textlinkbrokers.com>
2. <http://www.text-link-ads.com>
3. <http://www.linkadage.com>

Many times you can purchase 1 PR7 link for a 1 month time period for, say, \$150. After the month is up, there is no need to renew because you are already in Google's index! So, basically by paying \$150 you can be indexed by Google within 24 hours, with no work on your part.

So, there you have it. 2 SIMPLE ways to get indexed by Google extremely fast. Now, when someone mentions in a forum, bragging about how they've gotten indexed by Google in under 48 hours... you can laugh to yourself and know that it's really not rocket science :-)

That wraps up this lesson. Look for my email tomorrow, containing the next lesson titled:
