

"How To Skyrocket Past The #1 Ranked Website On Google For The Term Diet Information ..."

Now that we've analyzed the top ranked website in our niche, we need to do the necessary things to outrank them. As I taught you earlier, **it's not the onpage optimization factors that will give you the biggest change in ranking.**

Remember, onpage factors include:

- Page Title
- Header tags
- alt tags
- meta tags
- bolding, italicizing, and underlining
- Placing keyword in the correct position on the page

While onpage optimization is still something you should do, it's **NOT** what will get you high search engine rankings. It's the **offpage optimization** factors that will.

- **Who links to you and how they do it**

Copy the linking strategy of www.chasefreedom.com

Now that we know who links to www.chasefreedom.com (The #1 ranked website) and how they're doing it, we can begin to copy what they're doing.

The goal here is to contact the websites that link to www.chasefreedom.com and copy the exact linking strategy they're using to get a #1 ranking.

So, how the heck are we going to get hundreds of links pointing to our website, let alone contact all the websites that link to www.chasefreedom.com and get them to link to us?

Now, you could just visit them all manually and ...

- Search for their contact information.
- Open up your email program.
- Write out an email to this website and send it off to them.
- Then do this another 500+ times.

Or you could do this

The allows you to:

- Create as many email templates as you wish. This way, you only have to write the link request email once!
- Create custom links pages containing the websites you're going to send link request emails to.
Note: It's always best to add their link to your website before you ask them to link to yours. You'll get a much better response this way. SEO Elite allows you to add everyone's link to your website with a single click of a button. It's all automated!
- Blast out emails to thousands of websites at once!

To email more than 1 website at a time, simply click the row in the top frame and it will add the website to your email list. You can literally add thousands of websites to your email list!

From then, all you'll need to do is click "ok" and BAM!

You've just contacted 1,000+ websites at once!

Now, all you have to do is sit back and wait for them to email you back, stating that they've added your link to their website.

You have total control over who links to you and how they do it! BY contacting all of the websites that link to a top ranked website, you'll have a good chance at a good majority of those sites linking to you also. If your linking strategy is similar to the top ranked site, chances are, you'll ALSO have a top ranking!

Link Request template

Here's an example link request email that typically works pretty well:
